

Zoey Huang

(408) 802-4397 | szuh@berkeley.edu | [linkedin.com/in/szulun-huang](https://www.linkedin.com/in/szulun-huang) | github.com/szulun

EDUCATION

University of California, Berkeley — B.A. Data Science

Expected 06/2027

Data Science Honors | Coursework: Data Science Principles, Data Structures, Probability & Risk Analysis

De Anza College — Associate of Science, CS & Math

08/2023 – 08/2025

Dean's List (6 quarters), Summa Cum Laude, TechWise Fellowship (Google-funded, top 10%)

National Taiwan University of Science and Technology — MBA, E-commerce (Social Media)

Thesis: comparative study of Facebook user behavior in Taiwan vs. Germany | Exchange Scholarship, University of Stuttgart

PROFESSIONAL EXPERIENCE

PacketMicro, Inc. — Data & Operations Analyst, Santa Clara, CA

01/2026 – Present

- Built end-to-end CRM data pipeline (PDF → CSV → JSON → PostgreSQL) processing 900+ invoices/quotes; reduced leadership lookup time by ~70% and adopted for daily operations.
- Designed a configurable batch automation pipeline that replaced multi-step manual workflows for probe-station test data; standardized outputs and auto-generated reports, significantly cutting recurring manual effort.
- Building AI agent layer to classify customer emails and support quote generation, applying practical LLM techniques to real sales workflows.

Act Now Bay Area — Website Architecture & Technical Development, Remote

02/2026 – Present

- Extended Fung Fellowship dashboard into a collaborative climate data platform; currently leading site architecture and ongoing development.
- Secured partnerships with 6+ organizations (including Stanford, UC Berkeley CoolClimate, BAAQMD) to support platform adoption and data collaboration.

GotInfo — Data Analytics & Platform Strategy Intern, Remote

06/2026 – 07/2026

- Led analysis of 134-respondent consumer study; identified 30.6% market gap (53.7% stated intent vs. 23.1% actual purchase) and validated 91% product-market fit.
- Built executive analytics dashboard and summary adopted by leadership for investor presentations, onboarding, and grant applications.

Tektronix Taiwan, Ltd. — Business Analyst, Hsinchu, Taiwan

02/2015 – 06/2022

- Automated SQL/Pandas validation across 5 distributor reports, reducing manual effort by 80%.
- Applied Isolation Forest for anomaly detection on monthly inventory and POS data, enabling earlier identification of operational issues.

PROJECTS

Bay Area Climate Dashboard — Fung Fellowship × Act Now Bay Area, Lead Developer

02/2026 – 05/2026

Live: szulun.github.io/bay-area-climate-dashboard | Future Forward Innovation Award — Fung Fellowship

- Led 6-person team to build interactive multi-county dashboard with dual-mode UX (resident + policymaker) and drill-down analytics.

Solar Power Data Platform — Data Engineering + ML

01/2026

GitHub: [github.com/szulun/Solar-Power-Generation & Solar-ELT-Pipeline](https://github.com/szulun/Solar-Power-Generation-&Solar-ELT-Pipeline)

- Built end-to-end ELT pipeline ingesting 136K rows into SQLite with daily Airflow scheduling; developed Random Forest & XGBoost models ($R^2=0.98+$) that improved Plant 2 forecast accuracy by 76%.

Student Success Prediction Model — Classification ML, TechWise Fellowship

02/2025 – 03/2025

GitHub: github.com/szulun/TechWise-Project2-ML

- Achieved 1st place in internal ML competition by improving F1 score from 0.78 to 0.87 through feature engineering; used SHAP for interpretability and translated insights into intervention strategies.

TECHNICAL SKILLS

- Languages & Tools:** Python, SQL, PySpark, Airflow, Git
- Data & Analytics:** ETL/ELT Pipelines, Data Modeling, PostgreSQL, Tableau, Feature Engineering
- Machine Learning:** Scikit-learn, XGBoost, Time Series Forecasting, SHAP
- Other:** TypeScript, React, RESTful APIs
